

- What 5 major factors affect climate? Which is the most important?
- What is continentality?
- Landforms- what are they? How are they formed (internal vs. external processes)
- What is the difference between Developed and Developing Countries?
- What are vegetation & climate zones?
- How do vegetation & climate zones influence the way people live?
- What is a biome? 5 major biomes- Tundra, desert, rainforest, temperate forest, grasslands
- What are the major components of culture?
- How do people's homes and material items tell us about their culture?
- What is the difference between developing and developed countries?

Vocabulary:

1. Map Key/Legend
2. Map Scale
3. Compass Rose
4. Latitude --Equator
5. Longitude ---Prime meridian
6. Convergent Boundaries
7. Divergent Boundaries
8. Absolute and relative location
9. Map Projections
10. Ethnic groups
11. Weathering, erosion, deposition
12. Culture region
13. Developing countries
14. Developed countries

Governments:

1. Democracy
 2. Dictatorship
 3. Theocracy
 4. Communism
 5. Aristocracy
 6. Monarchy
- What are examples of each?
- What is a state?
- What is a nation?

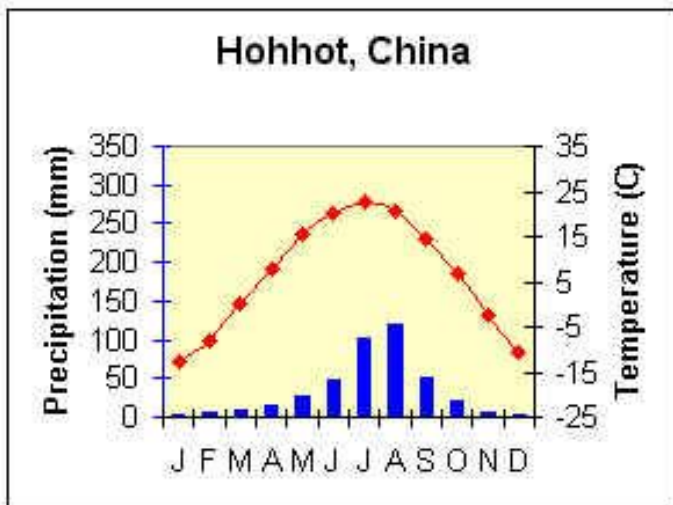

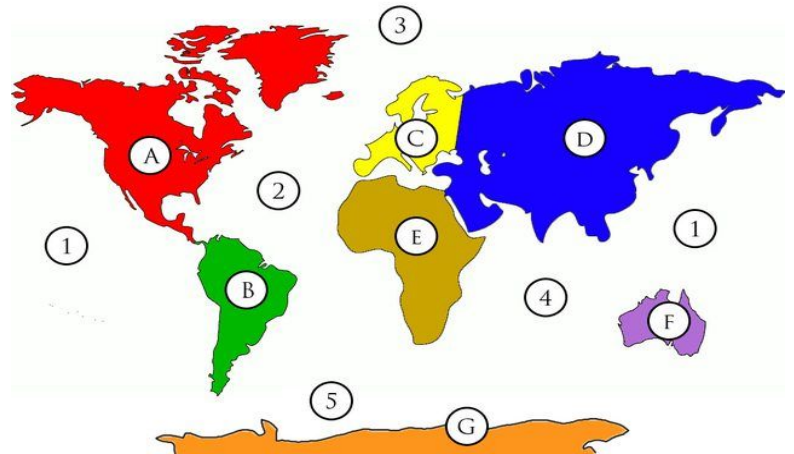

Types of maps-KNOW THE DIFFERENCE! : political maps, physical maps, thematic maps

Where are the Oceans?

- Indian Ocean
- Arctic Ocean
- Southern Ocean
- Atlantic Ocean
- Pacific Ocean

Continents – which continents are in which hemisphere?

- North America
- South America
- Europe
- Asia
- Australia
- Antarctica
- Africa

Climographs-

How do we read climographs?

What span of time do they cover?

What 2 factors do they measure (which is measured by the 'bars' and which is measured by the 'line')

How can we use climographs to determine continentality?
